Muskegon-Norton Shores, MI (MSA)	Government	590	520	514	-13%

GDP growth: -13 percent. The Muskegon metro area has struggled for decades to attract new investment to offset the decline of its manufacturing economy.

It's had some success in growing retail trade, health care, educational services, financial services and information. But growth in those areas over the past decade could not make up for major losses in manufacturing, construction and wholesale trade.
