Pt presents to ed via ems coming from Imperial nursing home for a cc of skin ulcer. Per ems pt has an un-stageable wound on his "sacral area that needs treatment". Pt is currently AOX0, per ems this is baseline. Pt is awake and alert at this time. Pt wound undressed. Large wound w/ purulent drainage noted to left side of buttocks. Wound found to have mepelex pad over it with latex glove inside w/ rolled up guaze in wound. EMS denies any other complaints reported from nursing home. Patient currently resting on bed. Respirations are normal and unlabored. Pt denies any further needs at this time. Siderails up x2. Bed is in lowest position and locked. Will continue to monitor and carryout further orders.
